

# Nuclear Technology

VOLUME 201 · NUMBER 3 · MARCH 2018

## Special issue on the Advanced Test Reactor

### Contents

#### CRITICAL REVIEW

- 191** ATR Compendium: Irradiation Test Capabilities  
*Samuel E. Bays, Gilles J. Youinou, Misti Lillo, Paul Gilbreath*

#### TECHNICAL PAPERS

- 209** Upgrading Limiting Peak-Power Analysis Techniques with Modern Validation and Uncertainty Quantification for the Advanced Test Reactor  
*Samuel E. Bays, Cliff B. Davis, Periann A. Archibald*
- 228** Extension of the Advanced Test Reactor Operating Envelope Via Enhanced Reactor Physics Validation Techniques  
*Joseph W. Nielsen, David W. Nigg, Daren R. Norman*
- 247** Evaluation of the Enhanced LEU Fuel (ELF) Design for Conversion of the Advanced Test Reactor to a Low-Enrichment Fuel Cycle  
*Mark D. DeHart, Zain Karriem, Michael A. Pope*
- 267** Evaluation of Corrosion in YA-Type ATR Fuel Element During Reactor PALM Cycle 153B  
*Jeffrey O. Brower, Michael V. Glazoff, Thomas J. Eiden, Aleksey V. Rezvoi*
- 286** Reducing Uncertainty in Hydrodynamic Modeling of ATR Experiments Via Flow Testing, Validation, and Optimization  
*W. F. Jones, W. R. Marcum, A. W. Weiss, C. B. Jensen, G. L. Hawkes, P. E. Murray, D. S. Crawford, J. W. Herter, J. C. Kennedy, N. E. Woolstenhulme, J. D. Wiest, D. B. Chapman, T. K. Howard, G. D. Latimer, A. M. Phillips*

#### INDEXES/CONTENTS

- 304** Author Index
- 305** Subject Index
- iii Contents of Volume 201
