

Subject Index

Volume 190 · Numbers 1, 2, and 3
April, May, and June 2018

- Acceleration scheme, 45
- Advanced heavy water reactor, 195
- Arrays, 176
- Boiling water reactor mathematical model, 73
- CANDU severe accident, 209
- CMFD, lpCMFD, 45
- Delta tracking, 56
- Direct injection, 93
- Eigenvalue, 31
- Fission product yields, 258
- Fully implicit coupling method, 156
- Heat mixing, 93
- Hexagonal Variational Nodal Method, 134
- Homogenization, 1
- Hopf bifurcation, 73
- Jacobian-free Newton-Krylov, 238
method, 287
- Material storage, 176
- Mechanistic models, 209
- Nodal diffusion, 1
- Nodal expansion method, 238
- Nodal response matrix, 134
- Operator splitting semi-implicit method, 287
- OECD/NEA Light Water Reactor Uncertainty Analysis in Modeling Benchmark, 271
- Particle and radiation transport, 105
- Physics-based preconditioner, 238
- Picard method, 156, 287
- Preconditioning, 31
- Prompt neutron emission, 258
- Rayleigh quotient, 31
- Reactor internals, 93
- RELAP/SCDAPSIM/MOD3.6, 209
- Response variance and skewness, 105
- Ring-type spacer grid, 195
- Second-order adjoint sensitivity analysis, 105
- Spectral correction, 1
- stability analysis, 73
- Surface density, 176
- Symmetry group theory, 134
- Thermal hydraulics, CTF, 271
- TINTE, 156
- Turbulent mixing rate, 195
- Variance reduction, 56
- Woodcock method, 56
- Yield evaluations, 258
