

# Nuclear Science and Engineering

VOLUME 193 · NUMBER 4 · APRIL 2019

## Contents

### TECHNICAL PAPERS

- 327** Approximate Methods for Inverting Generating Functions from the Pál-Bell Equations for Low Source Problems  
*M. M. R. Williams*
- 346** Validation and Verification of the Evaluated Electron Data Library in FRENSE  
*Luke J. Kersting, Douglass Henderson, Alex Robinson, Eli Moll*
- 368** A Coupled Multiscale Approach to TREAT LEU Feedback Modeling Using a Binary-Collision Monte-Carlo-Informed Heat Source  
*Adam Zabriskie, Sebastian Schunert, Daniel Schwen, Javier Ortensi, Benjamin Baker, Yaqi Wang, Vincent Laboure, Mark DeHart, Wade Marcum*
- 388** A Weighted Least-Squares Transport Equation Compatible with Source Iteration and Voids  
*Hans R. Hammer, Jim E. Morel, Yaqi Wang*
- 404** Benchmarks of Criticality in Solid-Moderated and Solid-Reflected Cores at Kyoto University Critical Assembly  
*Masao Yamanaka, Cheol Ho Pyeon*
- 417** Modified Point-Kinetics Model for Neutron Precursors and Fission Product Behavior for Fluid-Fueled Molten Salt Reactors  
*M. Scott Greenwood, Ben Betzler*
- 431** Estimation Method of Prompt Neutron Decay Constant Reducing Higher Order Mode Effect by Linear Combination  
*Ryota Katano*
