

Fusion Science and Technology

VOLUME 75 · NUMBER 6 · AUGUST 2019

**Selected papers from the 23rd Topical Meeting on the Technology of Fusion Energy—Fusion Neutronics and Tungsten
November 11–15, 2018, Orlando, Florida
Guest editor: Arkady Serikov**

Contents

iii Foreword
Arkady Serikov

TECHNICAL PAPERS

- 423** Neutronics Scoping Studies for Experimental Fusion Devices
M. Zucchetti, L. Candido, Z. Hartwig, R. Po', S. Segantin, R. Testoni, D. Whyte
- 429** Initial Neutronics Investigation of a Liquid-Metal Plasma-Facing Fusion Nuclear Science Facility
Tim D. Bohm, Andrew Davis, Moataz S. Harb, Edward P. Marriott, Paul P. H. Wilson
- 438** Neutronics Calculations for a Hypothetical Plasma-Jet-Driven Magneto-Inertial-Fusion Reactor
Lucas M. Rolison, Michael L. Fensin, Y. C. Francis Thio, Scott C. Hsu, Edward J. Cruz
- 452** MCNP Models for Tokamak Cooling Water System Equipment Evaluations
Georgeta Radulescu, Katherine E. Royston, Stephen C. Wilson, Walter Van Hove, David E. Williamson, Seokho H. Kim
- 458** Assessment of Activation on Level L3 of the Tokamak Building due to the ITER Tokamak Cooling Water System
Katherine Royston, Georgeta Radulescu, Walter Van Hove, Stephen Wilson, Seokho Kim
- 466** Neutronic Analysis for Feasibility of Fusion-Driven Subcritical System with Constant Fusion Power by Online Feeding of Molten Salt Fuel
Seonghee Hong, Myunghyun Kim
- 479** Improvement of the Neutron Production Rate of IEC Fusion Device by the Fusion Reaction on the Inner Surface of the IEC Chamber
Mahmoud Bakr, Kai Masuda, Masaya Yoshida
- 487** Preliminary Results of Neutron Transport in Blanket Module by MCNP with Profile Analysis Using Imaging Plate
Yasuyuki Ogino, Keisuke Mukai, Juro Yagi, Satoshi Konishi

—continued—

Contents continued

VOLUME 75 · NUMBER 6 · AUGUST 2019

- 493** Multiple Analytical Approach to Isotopic Transport Analysis in Magnetic Fusion Devices
Jonah D. Duran, Ezekial A. Unterberg, Mike P. Zach, William R. Wampler, Dmitry L. Rudakov, David C. Donovan
- 499** PHENIX U.S.-Japan Collaboration Investigation of Thermal and Mechanical Properties of Thermal Neutron-Shielded Irradiated Tungsten
Lauren M. Garrison, Yutai Katoh, Josina W. Geringer, Masafumi Akiyoshi, Xiang Chen, Makoto Fukuda, Akira Hasegawa, Tatsuya Hinoki, Xunxiang Hu, Takaaki Koyanagi, Eric Lang, Michael McAlister, Joel McDuffee, Takeshi Miyazawa, Chad Parish, Emily Proehl, Nathan Reid, Janet Robertson, Hsin Wang
- 510** Elemental Characterization of Neutron-Irradiated Tungsten Using the GD-OES Technique
Nathan C. Reid, Lauren M. Garrison, Chase N. Taylor, Jean Paul Allain
- 520** Development of Surface Morphologies on Single Crystal Tungsten Irradiated with 30 keV Helium Ions at 900°C
Karla B. W. Hall, Gerald L. Kulcinski, John F. Santarius, Richard L. Bonomo
- 526** Periodic Surface Morphology Characteristics of Tungsten Under Simultaneous Helium and Deuterium Bombardment at 30 keV
Matthew J. Jasica, Gerald L. Kulcinski, John F. Santarius
- 533** Pre-Irradiation Comparison of W-Based Alloys for the PHENIX Campaign: Microstructure, Composition, and Mechanical Properties
Eric Lang, Nathan Reid, Lauren Garrison, Chad Parish, J. P. Allain
- 542** Outer Divertor Damage Characterization from Deuterium Plasma Bombardment in Graphene-Coated Tungsten in the C-2W Device
Marcos X. Navarro, Marziyeh Zamiri, Martin E. Griswold, John F. Santarius, Gerald L. Kulcinski, Max Lagally, Toshiki Tajima
- 551** Development and Performance of Tungsten-Coated Graphitic Foam for Plasma-Facing Components
D. L. Youchison, J. W. Coenen, T. K. Gray, A. Lumsdaine, J. W. Klett, B. Jolly, M. Gehrig, S. Brezinsek, M. Rasinski
