

Selected papers from the 27th International Conference on Transport Theory (ICTT27)

Contents

- iii Foreword
Domiziano Mostacci, Barry Ganapol

REVIEW ARTICLE

- 2259 State of the Art in Cyclotrons for Radionuclide Production in Biomedicine
Mario Marengo, Gianfranco Cicoria, Angelo Infantino, Sara Vichi, Federico Zagni, Domiziano Mostacci

RESEARCH ARTICLES

- 2270 Benchmark Solutions for Radiative Transfer with a Moving Mesh and Exact Uncollided Source Treatments
William Bennett, Ryan G. McClarren
- 2301 Acceleration Waves in Cylindrical Shrinking Gas Bubbles
Francesca Brini, Leonardo Seccia
- 2317 A New Approach for NaI(Tl) Detector Efficiency Calibration Using ^{41}Ar Radionuclide for Air Exhaust Systems
Mahsa Farasat, Federico Zagni, Lorenzo Pompignoli, G. A. Pablo Cirrone, Ulrich W. Scherer, Lidia Strigari, Domiziano Mostacci
- 2327 Response Matrix/Discrete Ordinates Solution of the 1D Fokker-Planck Equation
B. D. Ganapol, Ó. López Pouso
- 2343 Frequency-Dependent Discrete Implicit Monte Carlo Scheme for the Radiative Transfer Equation
Elad Steinberg, Shay I. Heizler
- 2356 Neutron Multiplicity Counting Distribution Reconstruction from Moments Using Meixner Polynomial Expansion and N-Forked Branching Approximations
Philippe Humbert
- 2373 Physics-Informed Neural Networks for 1-D Steady-State Diffusion-Advection-Reaction Equations
Laura Laghi, Enrico Schiassi, Mario De Florio, Roberto Furfaro, Domiziano Mostacci

—continued—

Contents continued

VOLUME 197 · NUMBER 9 · SEPTEMBER 2023

- 2404** Asymptotic Expansion of the Angular Flux Applied to Discrete-Ordinates Source Iterations in Lattice Depletion Calculations
E. Masiello, F. Filiciotto, S. Lapuerta-Cochet, R. Lenain
- 2425** Nonconforming Three-Dimensional Model for PWR Control Rod Movements Without Homogenization and Cusping Effect
F. Filiciotto, E. Masiello, S. Cochet-Lapuerta, R. Lenain
- 2446** Kinetic Theory Study of Pressure and Equation of State in a Strongly Degenerate Fermi Gas
Vincenzo Molinari, Domiziano Mostacci, Francesco Teodori
- 2450** Numerical Study of the Influence of Collisions on Oscillations of the Electric Field for the Vlasov-Poisson-Landau Kinetic Equation
Irina Potapenko, Stanislav Karpov
- 2459** Towards a Systematic Requirement-Based Approach to Build a Neutronics Study Platform
Alberto Previti, Alberto Brighenti, Damien Raynaud, Barbara Vezzoni
- 2484** Physics-Informed Neural Network with Fourier Features for Radiation Transport in Heterogeneous Media
Quincy A. Huhn, Mauricio E. Tano, Jean C. Ragusa
- 2498** A Consistent Low-Order Acceleration Technique for Coarse Mesh Transport (COMET) Methods
Dingkang Zhang, Farzad Rahnema
- 2509** The Maximum Entropy Principle: General Extended Hydrodynamic Approach for Dynamic High-Field Transport in Monolayer Graphene
M. Trovato, P. Falsaperla, L. Reggiani
