

## Contents

### RESEARCH ARTICLES

- 755** Review on the Preparation and High-Temperature Oxidation Resistance of Metal Coating for Fuel Cladding Zirconium Alloys  
*Ling Sun, Yuchen Xiao, Weijiu Huang, Baifeng Luan, Baoan Wu, Huiyi Tang*
- 771** Post-Neutron Mass Yield Distribution in the Epi-Cadmium Neutron-Induced Fission of  $^{238}\text{Pu}$   
*H. Naik, R. J. Singh, S. P. Dange, W. Jang*
- 786** Measurements of the Neutron Total and Capture Cross Sections and Derivation of the Resonance Parameters of  $^{181}\text{Ta}$   
*Shunsuke Endo, Atsushi Kimura, Shoji Nakamura, Osamu Iwamoto, Nobuyuki Iwamoto, Gerard Rovira, Yosuke Toh, Mariko Segawa, Makoto Maeda*
- 804** An Experimental Investigation of Two-Phase Frictional Pressure Drop in Straight-Tube Steam Generator Used in SFR  
*S. P. Pathak, K. Velusamy, K. Devan, V. A. Suresh Kumar*
- 818** Interaction of Cesium Hydroxide with Oxide Layers Under Simulated Light Water Reactor Severe Accident  
*I Wayan Ngarayana, Kenta Murakami, Anis Rohanda, Tatsuya Suzuki*
- 825** Chromium Carbide Coatings for Inner-Side Fuel Cladding Protection: A Reactor Physics-Based Performance Analysis  
*Rofida H. Khelifa, Nicolay N. Nikitenkov, Viktor N. Kudiiarov*
- 832** Proper Orthogonal Decomposition Mode Coefficient Interpolation: A Non-Intrusive Reduced-Order Model for Parametric Reactor Kinetics  
*Zachary K. Hardy, Jim E. Morel*
- 853** A Novel High-Order Surface Characteristics Scheme for the Neutron Transport Equation in 2D Unstructured Meshes  
*Marco Tiberga, Simone Santandrea*
- 898** Impact Assessment of Radiative Heat Transport in ARC-Class Reactor FLiBe Liquid Immersion Blanket  
*Gabriele Ferrero, Raffaella Testoni, Massimo Zucchetti*

—continued—

## Contents continued

VOLUME 198 · NUMBER 4 · APRIL 2024

- 914** Linear Source Approximation in MPACT for Efficient and Robust Multiphysics Whole-Core Simulations

*Sooyoung Choi, Andrew Fitzgerald, Nicholas Herring, Brendan Kochunas*

- 945** On the Role of Axial Neutron Flux Mode Excitation in BWR Stability and Nonlinear Oscillations

*Yousef M. Farawila, Daniel R. Tinkler*
