

## Special issue on the Nuclear Energy Advanced Modeling and Simulation Thermal Hydraulics Integrated Research Project

### Contents

- iii Foreword  
*Elia Merzari*

### RESEARCH ARTICLES

- 1347** Study of Stable Stratification in HiRJET Facility With Direct Numerical Simulation  
*Cheng-Kai Tai, Jiaxin Mao, Victor Petrov, Annalisa Manera, Igor A. Bolotnov*
- 1371** Benchmark Experiments for Turbulent Mixing in the Scaled-Down Upper Plenum of High-Temperature Gas-Cooled Reactors Under Accident Scenario  
*J. Mao, S. Che, V. Petrov, A. Manera*
- 1386** High-Fidelity Simulation of Mixing Phenomena in Large Enclosures  
*Victor Coppo Leite, Elia Merzari, Jiaxin Mao, Victor Petrov, Annalisa Manera*
- 1404** Validation of RANS-Based Turbulence Models Against High-Resolution Experiments and DNS for Buoyancy-Driven Flow with Stratified Fronts  
*J. Mao, V. Vishwakarma, Z. Welker, C. K. Tai, I. A. Bolotnov, V. Petrov, A. Manera*
- 1426** Data-Driven High-to-Low for Coarse Grid System Thermal Hydraulics  
*Arsen S. Iskhakov, Victor Coppo Leite, Elia Merzari, Nam T. Dinh*
- 1439** Direct Numerical Simulation of Heat Transfer in a 7-Pin Wire-Wrapped Rod Bundle  
*Carolina Bourdot Dutra, Luiz Aldeia Machado, Elia Merzari*
- 1455** High-Fidelity Simulations of Shield Assembly Mixed-Convection Flows with Applications Toward Reduced-Resolution Modeling  
*Adam R. Kraus, Elia Merzari, Mathieu Martin, Dustin Langewisch, Yassin Hassan*
- 1477** Multiscale Modeling of Flow in Rod Bundles: From Direct Numerical Simulation and Subchannel to Coarse-Mesh CFD  
*Adam R. Kraus, Elia Merzari*
