

Fusion technology

CONTENTS / MAY 2000—VOL. 37, NO. 3

TECHNICAL PAPERS

- 185 Modeling of Surface Deformations During Plasma Disruptions / *Georgios Tsotridis*
- 198 Electrical Parameters of a Conducting Vacuum Vessel with a Rectangular Cross Section / *Long Wang*
- 211 QUATOS: A University-Scale Test of the Quasi-Toroidal Stellarator Concept / *Christopher Watts, Rex F. Gandy, James D. Hanson, Gregory J. Hartwell, Stephen F. Knowlton, Paul Garabedian, Antonino Carnevali*
- 225 The Effect of Gamma-Ray Transport on Afterheat Calculations for Accident Analysis / *Susana Reyes, Jeffery F. Latkowski, Javier Sanz*
- 231 Modeling an Unmitigated Quench Event in an ITER Toroidal Field Magnet / *Brad J. Merrill*
- 247 Experimental Results of Transmutation of Elements Observed in Etched Palladium Samples by an Excimer Laser / *Vincenzo Nassisi, Maria L. Longo*
- 253 Neutron Drop: Condensation of Neutrons in Metal Hydrides and Deuterides / *Hideo Kozima*

DEPARTMENTS

- 259 Meeting Report
The Fourth International Energy Agency International Workshop on Beryllium Technology for Fusion, Karlsruhe, Germany, September 15–17, 1999 / *Francesco Scaffidi-Argentina, Glen R. Longhurst*
- 264 Letters to the Editor
Strange Behavior of Tritiated Natural Water / *Anurag Shyam*
Response to "Strange Behavior of Tritiated Natural Water" / *Rainer W. Kühne*
Reply to "Comments on 'Transmutation in a Gold-Light Water Electrolysis System'" / *Edward Lewis*
- 268 Volume 37 Indexes
v Volume 37 Contents
