

Fusion Science and Technology

CONTENTS / SEPTEMBER 2001—VOL. 40, NO. 2

TECHNICAL PAPERS

- 119 Possible Generation of Self-Magnetic Fields / *Thomas J. Dolan*
- 125 Termination of Plasma Discharge by High-Z Liquid Impurity Jet Injection in a Tokamak Reactor / *Yasuyuki Itoh, Yoshiki Murakami, Satoshi Nishio*
- 133 Radioactivity Sputtered from Cooling-Pipe Materials into Coolant in the ITER Cooling System / *Bangjiao Ye, Yoshimi Kasugai, Yujiro Ikeda, Yangmei Fan, Rongdian Han*
- 139 Theoretical Model of the Probability of Fusion Between Deuterons Within Deformed Crystalline Lattices with Microcracks at Room Temperature / *Fulvio Frisone*
- 147 Search for ^3He and ^4He in Arata-Style Palladium Cathodes I: A Negative Result / *W. Brian Clarke*
- 152 Search for ^3He and ^4He in Arata-Style Palladium Cathodes II: Evidence for Tritium Production / *W. Brian Clarke, Brian M. Oliver, Michael C. H. McKubre, Francis L. Tanzella, Paolo Tripodi*

DEPARTMENTS

- 168 Meeting Summaries
Summary of the 18th International Atomic Energy Agency Fusion Energy Conference Stability, Current Drive and Heating, and Energetic Particles Sessions / *Ksenia A. Razumova*
Summary of the 18th International Atomic Energy Agency Fusion Energy Conference Inertial Fusion Energy Research Sessions / *K. Mima*
- 189 Meeting Report
Resolution of the Eighth Russian Conference on Cold Nuclear Transmutation of Chemical Elements (RCCNT-8), October 4–11, 2000 / *Yuri N. Bazhutov, Igor V. Goryachev*
