

# Fusion Science and Technology

CONTENTS / APRIL 2005—VOL. 47, NO. 3

**Proceedings of the  
Sixteenth Topical Meeting on  
THE TECHNOLOGY OF FUSION ENERGY  
(Part 1)**

**Madison, Wisconsin  
September 14–16, 2004**

vii Comments / *Nermin A. Uckan*

ix Preface: Sixteenth Topical Meeting on the Technology of Fusion Energy /  
*Gerald Kulcinski*

#### **FUSION PLENARY AND OVERVIEW**

**279** Large Energy Development Projects: Lessons Learned from Space and Politics /  
*Harrison H. Schmitt*

**291** Historical Perspective on the United States Fusion Program / *Stephen O. Dean*

**300** Overview of Recent Japanese Activities in Fusion Technology / *Masahiro Seki,  
I. Yamamoto, A. Sagara*

**308** European Technological Effort in Preparation of ITER Construction /  
*Roberto Andreani*

**314** The National Ignition Facility: Laser Performance and First Experiments /  
*Edward I. Moses, Craig R. Wuest*

**323** Future World Energy Demand and Supply: China and India and the Potential  
Role of Fusion Energy / *John Sheffield*

**330** Fusion Power: A Strategic Choice for the Future Energy Provision. Why is So  
Much Time Wasted for Decision Making? / *William D. D'haeseleer*

#### **EXPERIMENTAL DEVICES AND ADVANCED DESIGNS**

**339** W7-X Progress / *M. Gasparotto et al.*

**345** Advanced Control Techniques and High Performance Discharges on DIII-D /  
*A. G. Kellman for the DIII-D Team*

**355** Progress in Technology at JET / *A. S. Kaye et al.*

**363** Recent Technological Progress for Advanced Tokamak Research in JT-60U and  
JFT-2M / *N. Hosogane, the JT-60 Team, JFT-2M Group*

(Continued)

# CONTENTS / APRIL 2005—VOL. 47, NO. 3

(Continued)

- 370** Fusion Engineering and Plasma Science Conditions of Spherical Torus Component Test Facility / *Y.-K. M. Peng et al.*
- 384** European Fusion Power Plant Studies / *I. Cook et al.*
- 393** FIRE, A Test Bed for ARIES-RS/AT Advanced Physics and Plasma Technology / *Dale M. Meade*
- 400** Reactors with Stellarator Stability and Tokamak Transport / *Paul R. Garabedian, Long-Poeh Ku, the ARIES Team*
- 406** Exploration of Compact Stellarators as Power Plants: Initial Results from ARIES-CS Study / *Farrokh Najmabadi, the ARIES Team*
- 414** Optimization of Stellarator Reactor Parameters / *J. F. Lyon et al.*
- 422** Attractive Design Approaches for a Compact Stellarator Power Plant / *A. R. Raffray, L. El-Guebaly, S. Malang, X. Wang, the ARIES Team*
- 432** Benefits of Radial Build Minimization and Requirements Imposed on ARIES Compact Stellarator Design / *L. El-Guebaly et al.*
- 440** Initial Activation Assessment for ARIES Compact Stellarator Power Plant / *L. El-Guebaly, P. Wilson, D. Paige, the ARIES Team*
- 445** Synergies Between Generation-IV and Advanced Fusion Power Plant Research Programs / *Paul P. H. Wilson, Todd R. Allen, Laila A. El-Guebaly*
- 450** Experiments to Improve Power Conversion Parameters in a Traveling Wave Direct Energy Converter Simulator / *Hiromasa Takeno, Yuusuke Kiriya, Yasuyoshi Yasaka*
- 455** Particle Discrimination Experiment for Direct Energy Conversion / *Y. Yasaka, Y. Kiriya, S. Yamamoto, H. Takeno, M. Ishikawa*
- 460** Optimized Helium-Brayton Power Conversion for Fusion Energy Systems / *Haihua Zhao, Grant Fukuda, Ryan P. Abbott, Per F. Peterson*

## FIRST WALL, BLANKET, AND SHIELD

- 469** Interface of Blanket Testing and ITER Design / *V. Chuyanov, ITER International Team*
- 475** U.S. Plans and Strategy for ITER Blanket Testing / *M. Abdou et al.*
- 488** Thermofluid Magnetohydrodynamic Issues for Liquid Breeders / *N. B. Morley, S. Malang, I. Kirillov*
- 502** Assessment of First Wall and Blanket Options with the Use of Liquid Breeder / *C. P. C. Wong et al.*
- 510** Neutronics Assessment of Molten Salt Breeding Blanket Design Options / *M. E. Sawan, S. Malang, C. P. C. Wong, M. Z. Youssef*
- 518** Activation Analysis for Two Molten Salt Dual-Coolant Blanket Concepts for the U.S. Demo Reactor / *M. Z. Youssef, M. E. Sawan*

(Continued)

# CONTENTS / APRIL 2005—VOL. 47, NO. 3

(Continued)

- 524** Innovative Liquid Breeder Blanket Design Activities in Japan /  
*Akio Sagara et al.*
- 530** Tritium Self-Sufficiency and Neutron Shielding Performance of Self-Cooled  
Liquid Blanket System for Helical Reactor / *Teruya Tanaka, Takeo Muroga,*  
*Akio Sagara*
- 535** A Lithium Self-Cooled Blanket for the HAPL Conceptual Inertial Confinement  
Reactor / *I. N. Sviatoslavsky, A. R. Raffray, M. E. Sawan, X. Wang*
- 540** Neutronics Investigation into Lithium/Vanadium Test Blanket Modules /  
*T. Muroga, T. Tanaka*
- 544** Views on Neutronics and Activation Issues Facing Liquid-Protected IFE  
Chambers / *L. El-Guebaly, the ARIES Team*
- 549** Thermal Modeling of the Sandia Flinabe (LiF-BeF<sub>2</sub>-NaF) Experiments /  
*R. E. Nygren*
- 554** Measurement of the Melting Point Temperature of Several Lithium-Sodium-  
Beryllium Fluoride Salt (Flinabe) Mixtures / *J. M. McDonald et al.*
- 559** MHD Effects on Heat Transfer in a Molten Salt Blanket / *Sergey Smolentsev,*  
*Reza Miraghaie, Mohamed Abdou*
- 564** A Study of Liquid Metal Film Flow, Under Fusion Relevant Magnetic Fields /  
*M. Narula, A. Ying, M. A. Abdou*
- 569** Experimental Research on Heat Transfer Enhancement for High Prandtl-Number  
Fluid / *Shin-ya Chiba et al.*
- 574** Initial Study of Supercritical Fluid Blowdown / *Guillaume Mignot,*  
*Mark Anderson, Michael Corradini*

## INERTIAL FUSION TECHNOLOGY

- 581** Full System Operations of Mercury: A Diode Pumped Solid-State Laser /  
*C. Bibeau et al.*
- 585** Development of a Dry Wall Concept for Laser IFE Chambers /  
*James P. Blanchard, Carl J. Martin*
- 591** Pulsed X-Ray Exposures and Modeling for Tungsten as an IFE First Wall  
Material / *J. F. Latkowski, R. P. Abbott, R. C. Schmitt*
- 596** Hybrid Al/SiC Composite Optics for IFE Applications / *W. Kowbel, M. Tillack*
- 601** An Overview of Georgia Tech Studies on the Fluid Dynamics Aspects of Liquid  
Protection Schemes for Fusion Reactors / *S. I. Abdel-Khalik, M. Yoda*
- 610** Experimental and Numerical Investigation of Mist Cooling for the Electra  
Hibachi / *V. Novak, D. Sadowski, S. Shin, K. Schoonover, S. I. Abdel-Khalik*
- 616** Update on Progress and Current Research in the Development of Heavy Ion  
Fusion / *W. R. Meier*
- 621** Towards a Modular Point Design for Heavy Ion Fusion / *S. S. Yu et al.*

(Continued)

# CONTENTS / APRIL 2005—VOL. 47, NO. 3

(Continued)

- 626** Dynamics of Liquid-Protected Fusion Chambers / *Philippe M. Bardet et al.*
- 633** Development Path for Z-Pinch IFE / *C. Olson et al.*
- 641** Progress Toward Development of an IFE Power Plant Using Z-Pinch Technology / *Gary E. Rochau, the Z-Pinch Power Plant Team*
- 645** Manufacturing Concepts for an IFE Power Plant Using Z-Pinch Technology / *B. B. Cipiti, G. E. Rochau*
- 650** Thermal Analysis of the Z-Pinch Power Plant Concept / *M. A. Modesto, E. R. Lindgren, C. W. Morrow*
- 656** Z-Pinch Power Plant Shock Mitigation Experiments, Modeling, and Code Assessment / *Sal B. Rodriguez, Vincent J. Dandini, Virginia L. Vigil, Matt Turgeon, Dave Louie*
- 662** Present Status of Fast Ignition Research and Prospects of FIREX Project / *K. Mima et al.*

## DIVERTOR AND PLASMA-FACING COMPONENTS

- 669** Overview of the ALPS Program / *J. N. Brooks et al.*
- 678** EU Development of High Heat Flux Components / *J. Linke et al.*
- 686** Plasma/Liquid-Metal Interactions During Tokamak Operation / *A. Hassanein, J. P. Allain, Z. Insepov, I. Konkashbaev*
- 698** The Use of Liquid Ga and Li as Limiter Material in T-3M and T-11M Tokamaks / *S. V. Mirnov, V. A. Evtikhin*
- 703** Lithium-Gettered Moving Surface Plasma-Facing Components for Particle Control in Steady State Magnetic Fusion Devices / *Yoshi Hirooka, Hirotsugu Ohgaki, Souichirou Hosaka, Yusuke Ohtsuka, Masahiro Nishikawa*
- 708** Design Constraints for Liquid-Protected Divertors / *S. Shin, S. I. Abdel-Khalik, M. Yoda, the ARIES Team*
- 713** Experimental Analysis of Soaker Hose Concept for First Wall/Divertor Application / *Tomotaka Morikawa, Alice Ying, Jonathan Burris, Mohamed Abdou*
- 718** Impact of Boundary-Layer Cutting and Flow Conditioning on Free-Surface Behavior in Turbulent Liquid Sheets / *S. G. Durbin, M. Yoda, S. I. Abdel-Khalik*
- 724** Flow Conditioning Design in Thick Liquid Protection / *S. G. Durbin, M. Yoda, S. I. Abdel-Khalik*
- 729** Optimization of the HETS HE-Cooled Divertor Concept: Thermal Fluid and Structural Analysis / *Panos J. Karditsas*
- 734** Prediction of Pressure Drop in the ITER Divertor Cooling Channels / *S. T. Yin, J. L. Chen*
- 740** Heat Transfer Enhancement Technique with Copper Fiber Porous Media / *Hisae Togashi, Kazuhisa Yuki, Hidetoshi Hashizume*
- 746** KTM Experimental Complex Project Status / *I. L. Tazhibayeva et al.*

(Continued)

# CONTENTS / APRIL 2005—VOL. 47, NO. 3

(Continued)

## PLASMA ENGINEERING, HEATING, CURRENT DRIVE, AND CONTROL

- 753** ITER Ion Cyclotron Heating and Fueling Systems / *D. A. Rasmussen et al.*
- 758** Long Pulse Operation on NBI Systems for JT-60U / *N. Akino et al.*
- 763** Nonrigid, Linear Plasma Response Model Based on Perturbed Equilibria for Axisymmetric Tokamak Control Design / *A. S. Welander, R. D. Deranian, D. A. Humphreys, J. A. Leuer, M. L. Walker*
- 768** Integrated Plasma Control in Next-Generation Devices Using DIII-D Modeling and Simulation Approaches / *R. D. Deranian et al.*
- 774** Automatic Fault-Checking System on the DIII-D Tokamak / *J. T. Scoville, M. L. Walker*
- 779** Numerical Study on Behavior of Hydrogen Ice Pellet in Drift Tube / *Takehiko Yokomine, Yukihiro Yonemoto, Shinji Ebara, Akihiko Shimizu*
- 784** Magnetic Method to Characterize the Current Densities in Breaker Arc / *Nadia Machkour*
- 790** Nonlinear Methods for Current Limit Constraint Satisfaction in Tokamak Plasma Shape Control / *M. L. Walker, D. A. Humphreys, R. D. Johnson, J. A. Leuer*
- 796** Effect of Nuclear Elastic Scattering on Neutral Beam Injection Heating in Thermonuclear Plasmas / *H. Matsuura, Y. Nakao*
- 801** Correlations of ELM Frequency with Pedestal Plasma Properties / *G. Kamberov, L. Popova, P. Marinov, V. Hristov*
- 806** Information Technology Systems for Fusion Industry and ITER Project / *N. Putvinskaya et al.*
- 814** Developments in Remote Collaboration and Computation / *J. R. Burruss et al.*
