

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 136, NUMBER 1, SEPTEMBER 2000

CONTENTS

vii Editorial

TECHNICAL PAPERS

- | | | |
|-----|--|---|
| 1 | The Screened Rutherford Pencil Beam Problem with Heterogeneities | <i>G. C. Pomraning</i> |
| 15 | Higher-Order Boundary Condition Perturbation Theory for the Diffusion Approximation | <i>Michael Scott McKinley,
Farzad Rahnema</i> |
| 34 | Some Aspects of Neutron Transport in Spatially Random Media | <i>M. M. R. Williams</i> |
| 59 | Adjoint Sensitivity Analysis of the RELAP5/MOD3.2 Two-Fluid Thermal-Hydraulic Code System—I: Theory | <i>D. G. Cacuci, M. Ionescu-Bujor</i> |
| 85 | Adjoint Sensitivity Analysis of the RELAP5/MOD3.2 Two-Fluid Thermal-Hydraulic Code System—II: Applications | <i>M. Ionescu-Bujor, D. G. Cacuci</i> |
| 122 | A Synthetic Acceleration for a Two-Dimensional Characteristic Method in Unstructured Meshes | <i>Richard Sanchez,
Abdelhahed Chetaine</i> |
| 140 | The Transport of Neutral Hydrogen Atoms in a Hydrogen Plasma | <i>R. D. M. Garcia, C. E. Siewert</i> |
