CONTENTS / JANUARY 1998—VOL. 121, NO. 1

- 1 Note from the Editor / *Nicholas Tsoulfanidis*

KIYOSE BIRTHDAY ANNIVERSARY SPECIAL

TECHNICAL PAPERS

- 3 Fault-Tree Analysis of Criticality in a Pulsed Column of a Typical Reprocessing Facility / *Yasushi Nomura, Yoshitaka Naito*
- 14 Study on the Permeability of Engineered Barriers for the Enhancement of a Radioactive Waste Repository System / *Shingo Tashiro, Ai Fujiwara, Muneaki Senoo*
- 24 Integrated Radionuclide Transport Model for a High-Level Waste Repository in Water-Saturated Geologic Formations / *Joonhong Ahn*
-

TECHNICAL PAPERS

REACTOR SAFETY

- 40 Stability of Natural Circulation Boiling Water Reactors: Part I—Description Stability Model and Theoretical Analysis in Terms of Dimensionless Groups / *David D. B. van Bragt, Tim H. J. J. van der Hagen*
- 52 Stability of Natural Circulation Boiling Water Reactors: Part II—Parametric Study of Coupled Neutronic-Thermohydraulic Stability / *David D. B. van Bragt, Tim H. J. J. van der Hagen*

CRITICALITY OF NUCLEAR MATERIALS

- 63 Self-Diffusion of Sodium Ions in Compacted Sodium Montmorillonite / *Tamotsu Kozaki, Atsushi Fujishima, Seichi Sato, Hiroshi Ohashi*

HUMAN FACTORS

- 70 Probabilistic Model of Iodine Release for Steam Generator Tube Primary-to-Secondary Leakage Induced by Main Steam-Line Break / *Peter S. Jackson, Patrick J. Williams*

REACTOR OPERATIONS AND CONTROL

- 81 Control of a Fast Reactor Cooled by Supercritical Light Water / *Tohru Nakatsuka, Yoshiaki Oka, Seiichi Koshizuka*
