

GERMAN DIRECT DISPOSAL PROJECT SPECIAL

- 93 Editorial Note / *Günther Kessler*
- 95 Preface / *H. H. Hennies*
- 97 Background: The Research and Development Program for Direct Disposal /
C. Eitner, D. Lummerzheim

TECHNICAL PAPERS

- 101 Fifteen Years of Research and Development on Direct Disposal in Germany:
An Overview / *Klaus-Detlef Closs, Reiner Papp*
- 114 An Assessment of the Results of the Direct Disposal Project by the Federal
Ministry for the Environment, Nature Conservation, and Nuclear Safety /
Manfred Bloser, Thomas Beuth
- 120 Evaluation of Direct Disposal from the Point of View of One Utility and
Perspectives for Waste Management / *Wolfgang Heni*
- 128 Status of the Gorleben Pilot Conditioning Plant / *Hans-Otto Willax*
- 136 Status of the Development of Final Disposal Casks and Prospects in Germany /
Klaus Janberg, Harry Spilker
- 148 Conceptual Design and Demonstration Tests for Disposal of Spent Fuel in a Salt
Repository / *Hans-Jürgen Engelmann*
- 162 International Nuclear Material Safeguards for the Direct Final Disposal of
Spent-Fuel Assemblies / *Bernd Richter*
- 168 Retrievalability of Spent Nuclear Fuel After Final Disposal in a Salt Dome /
Enrique A. Biurrun
- 174 Long-Term Stability of Spent Nuclear Fuel Waste Packages in Gorleben Salt
Repository Environments / *Bernd Grambow, Andreas Loida, Emmanuel Smailos*
- 189 Special Safety Aspects of Drift Disposal—The Thermal Simulation of the Drift
Storage Experiment / *Tilmann Rothfuchs, Johannes Droste, Hans-Karl
Feddersen, Stefan Heusermann, Jörn U. Schneefuss, Alexandra Pudewills*
- 199 Evaluation of Repository Concepts for the Disposal of Spent Fuel on the Basis
of Geotechnical Safety Indicators and Exploration Data / *Michael Langer,
Manfred Wallner*
- 212 A Comparison of Long-Term Safety Aspects—Concepts for Disposal of Spent
Fuel and Wastes from Reprocessing / *Richard Storck, Dieter Buhmann*
- 221 Further Development Work for a Future Gorleben Repository / *Jürgen P.
Lempert*
