

# nuclear technology®

CONTENTS / APRIL 2000—VOL. 130, NO. 1

## TECHNICAL PAPERS

### FISSION REACTORS

- 1 A Pin Power Reconstruction Method for CANDU Reactor Cores Based on Coarse-Mesh Finite Difference Calculations / *Hyung-Seok Lee, Won Sik Yang, Man Gyun Na, Hangbok Choi*

### FUEL CYCLE AND MANAGEMENT

- 9 Fission Gas Release from  $UO_{2+x}$  in Defective Fuel Rods / *Yeon Soo Kim*

### THERMAL HYDRAULICS

- 18 RELAP5 Simulation of Thermal-Hydraulic Behavior in a CANDU Reactor—Assessments of RD-14 Experiments / *Sukho Lee, In-Goo Kim*
- 27 Development of a Dynamic Event Tree for a Pressurized Water Reactor Steam Generator Tube Rupture Event / *Chun-Chang Chao, Chin-Jang Chang*
- 39 Heat Transfer Modeling During a Vapor Explosion / *Georges Berthoud*

### NUCLEAR PLANT OPERATIONS AND CONTROL

- 59 Hydrogen Water Chemistry Technology in Boiling Water Reactors / *Chien C. Lin*

### RADIOACTIVE WASTE MANAGEMENT AND DISPOSAL

- 71 Analysis of Radionuclide Release from Spent Ion-Exchange Resins / *So-Il Su, Man-Sung Yim*
- 89 Alternatives to High-Level Waste Vitrification: The Need for Common Sense / *Jimmy T. Bell*

## TECHNICAL NOTE

### THERMAL HYDRAULICS

- 99 A Comparison of Natural Convection Heat Transfer for a Staggered Versus an Aligned Array of Horizontal Spent Nuclear Fuel Rods Within a Rectangular Enclosure / *C. Eric Triplett, Robert E. Canaan, Dale E. Klein*
