

TECHNICAL PAPERS

REACTOR SAFETY

- 191** Risk-Informed Design Changes in a Passive Decay Heat Removal System / *Giovanbattista Patalano, George E. Apostolakis, Pavel Hejzlar*
- 209** Validation of Severe Accident Codes on the Phebus Fission Product Tests in the Framework of the PHEBEN-2 Project / *K. Mueller, S. Dickinson, C. de Pascale, N. Girault, L. Herranz, F. De Rosa, G. Henneges, J. Langhans, C. Housiadas, V. Wichers, A. Dehbi, S. Paci, F. Martin-Fuertes, I. Turcu, I. Ivanov, B. Toth, G. Horvath*
- 228** Aerosol Studies in a Nuclear Aerosol Test Facility Under Different Turbulence Conditions / *B. K. Sapra, Y. S. Mayya, Arshad Khan, Faby Sunny, Sunil Ganju, H. S. Kushwaha*
- 245** Quantum-Chemical Calculations of the Equilibrium Constants of a Fission Product Mixture in a Steam-Hydrogen Carrier Gas in Severe Accident Conditions / *Jan Machacek, Laurent Cantrel, Peter Kluvanek, Marek Liska, Ondrej Gedeon*

FUEL CYCLE AND MANAGEMENT

- 252** Behavior of a Defective Nuclear Fuel Rod in Dry Storage Conditions Studied with a New Experimental Setup / *L. Desgranges, M. P. Ferroud-Plattet, R. Alloncle, I. Aubrun, J. M. Untrau, P. Lhuillery*

THERMAL HYDRAULICS

- 261** Analysis of Steam Condensation Heat Transfer with a Noncondensable Gas in a Vertical Condenser Tube / *Kwon-Yeong Lee, Moo Hwan Kim*
- 273** COBRA-TF Analysis of the High Flux Reactor Hot Channel for a Postulated Large-Break Loss-of-Coolant Accident / *Sule Ergun, Jason G. Williams, Lawrence E. Hochreiter, Hergen Wiersema, Marcel Sloopman, Marek Stempniewicz*

REPROCESSING

- 285** Thermal Stability and Safe Venting of the Tri-N-Butyl Phosphate–Nitric Acid–Water (“Red Oil”) System—I: Two-Layer System Mass Transfer Theory / *Michael Epstein, Hans K. Fauske, Charles F. Askonas, Marc A. Vial, Patricia Paviet-Hartmann*
- 294** Thermal Stability and Safe Venting of the Tri-N-Butyl Phosphate–Nitric Acid–Water (“Red Oil”) System—II: Experimental Data on Reaction Self-Heat Rates and Gas Production and Their Correlation / *Michael Epstein, Hans K. Fauske, Charles F. Askonas, Marc A. Vial, Patricia Paviet-Hartmann*

(Continued)

CONTENTS / AUGUST 2008—VOL. 163, NO. 2

(Continued)

- 307** Thermal Stability and Safe Venting of the Tri-N-Butyl Phosphate–Nitric Acid–Water (“Red Oil”) System—III: Predictions of Thermal Stability Boundaries and Required Vent Size / *Michael Epstein, Hans K. Fauske, Charles F. Askonas, Marc A. Vial, Patricia Paviet-Hartmann*

MATERIALS FOR NUCLEAR SYSTEMS

- 321** Production of High-Density Uranium Carbide Compacts for Use in Composite Nuclear Fuels / *Gokul Vasudevamurthy, Travis W. Knight*
